

*If you want to get  
commission-free bookings from the Internet –  
get a hotel system that includes  
a web booking engine*

# **H**otelinx Suite

*Hotellinx.Net is a booking engine for your own web site. It is totally integrated with Hotellinx Suite, allowing the hotel to receive Internet bookings directly. Real-time and commission-free.*

If a travel agent or web site gives you business that you would not otherwise have gotten, it is worth paying for. But if your guests can make bookings directly on your own web site, there is no reason why you should pay commission or transaction fees for them. Save money by choosing a hotel system that has its own web booking engine with yield management possibilities!

### **Hotellinx.Net has no transaction fees**

Buy or rent Hotellinx.Net, the maintenance is part of the Hotellinx Suite maintenance package and there is no per reservation charge.

### **Hotellinx Suite Profit Engine can be utilised for web bookings, too**

Both Hotellinx Suite and Hotellinx.Net can sense changes in estimated occupancy and always offer the best price. Including early-bird and last-minute discounts.

### **The hotel can control its Hotellinx.Net user groups**

Individual guests can see if there are rooms available and at what prices, and make their own reservations. Account keepers, e.g. secretaries making reservations for a company, have access to all reservations they have made. Own organization/trusted users can see the booking situation and select rate categories.

### **Hotellinx.Net can be customised for your hotel**

You can have as many languages as you want to, decide what pictures to show, write your own texts for confirmation and cancellation letters, ...
