### Internet reservations on your own web site with 0% commission!

**NetHotel** gives you Internet reservations directly from your own web site. Because no third party is involved, there will be no unnecessary commissions to pay and the whole profit for reservations made on its own web site will go to the hotel.

**NetHotel** sells as long as there are suitable rooms and rates. Rates and availability are taken directly from the hotel database and reservations are inserted directly into the database –no allotments or extra work. NetHotel shows special offers and campaign rates and it will also release and close rates depending on the current booking situation and the general yield rules that you have set.

**NetHotel** increases your chances to sell, because all information about your hotel and its facilities and specialties is available to guests when they make their decision.

**NetHotel** sends email confirmations automatically and, if you like, also SMS confirmations.

**NetHotel** is a tool also for group leaders and agents who can make reservations for several individual guests and companies and create and maintain name lists. Agents can have their own NetHotel rates.

**NetHotel** can be set up in a number of different ways, the demo environment where you can **try NetHotel** is just one of them. With the standard setup it is easy and cheap to get started.

**NetHotel** is suitable for both individual hotels and hotel groups.
